Sprint Goals

BigChainDB Setup

We wanted to separate the actions between MongoDB and BigChainDB.

Ux Design

With the end of the first sprint our goal was functionality, in this sprint we aimed for the better appearance as well.

Technologies

MERN...The bread and butter of the app.

Front-end

React

Redux-actions

Bootstrap 4

Back-end

Node.js

Express.js

Database

MongoDB

BigChainDB

BigChainDb

Approach 1

We have a straightforward approach to providing what our market demands. Why complicate the software when you can present it for what it truly is - a fast, safe, and reliable tool for user-friendly browsing?

Approach 2

We listen to our customers. We do not insist on simply staying put; we take into consideration their feedback and requests and explore each area of improvement thoroughly.

Approach 3

The web isn't our only home. We have strong school-business partnerships and offer business-to-business services.

Meet the Team

Prassas Thanos

**Dimou Giorgos
Konstantinos**

Mesimeris Michael

Kessidis Nikos

Lazogiannis Sotiris

Thank you for your time!
